Use Cases

- IT Teams
- Finance
- Procurement
- Operations
- Facilities
- Compliance

AI Capabilities

 Predictive Maintenance AI forecasts asset failures before they happen reduces downtime by up to 50%	 AI-Powered Search Instantly locate any asset across SharePoint using intelligent search even without exact names	 Workflow Automation Automates assignments, maintenance scheduling, renewal alerts, and depreciation calculations
--	--	--

Core Features

 Real-Time Asset Tracking Track every asset's location, status, assigned user, and usage history in a single live view across your organization.	 Inventory Management Manage fixed assets, consumables, and stock levels with auto-restock alerts to prevent shortages and overbuying
 Software License Management Track software licenses, renewals, and usage eliminate overspend and stay compliant with zero manual effort	 Depreciation Tracking Automated straight-line, double declining balance, and custom depreciation for accurate financial reporting
 QR Code & Barcode Scanning Generate, print, and scan QR codes and barcodes for fast asset identification and seamless inventory counts	 Check-in / Check-out Instantly assign or reclaim assets with a few clicks full audit trail of who has what, when, and where
 Role-Based Access Control Granular permissions ensure teams only see and manage assets relevant to their role zero data leakage	 Reports & Dashboards Real-time dashboards show asset utilization, lifecycle status, costs, and audit logs for smarter budget planning

Key Benefits

- Reduce equipment downtime by up to 50% with AI-driven predictive maintenance scheduling

• Eliminate overspending identify underutilized, duplicate, or expired assets before renewing

• All data stays within Microsoft 365 — Zero Trust security, no external cloudexposure

• Deploy in under 10 minutes — import assets via Intune, SCCM, CSV, or Excel

• GCC & GCC High certified — built for US Federal government cloud tenants

• Scales from SMEs to enterprises — no complex infrastructure required

Integrations

- Microsoft Teams
- SharePoint
- Outlook
- Microsoft Intune
