- Facility
- Procurement
- Access & Onboarding
- Operations

AI Capabilities

Smart Ticket AI
Auto-categorize, prioritize, and route tickets using AI models.

Chatbot Bubble 365
AI & NLP chatbot answers FAQs, handles requests, and integrates with knowledge bases.

AI Copilot
Built-in copilot suggests replies, summarizes conversations, and recommends resolutions.

Core Features

Omnichannel Ticketing
Capture tickets via Teams, Outlook, SharePoint, Web, and custom all in a unified queue.

Rules & Automation
Condition-based routing, auto-assignment, escalation rules, and SLA enforcement no code required.

Analytics & CSAT Reports
Pre-built dashboards track response time, agent performance, ticket trends, and satisfaction scores.

Self-Service Knowledge Base
FAQ and troubleshooting guides help employees find answers before creating tickets.

Ticket Splitting & Merging
Split multi-issue tickets or merge duplicates for clean efficient workflows.

SLA Management
Enforce SLA deadlines based on priority, department, or ticket severity with automated alerts.

Custom Forms & Columns
Design intake forms with custom fields and conditional logic for structured data collection.

Outlook Calendar Integration
Schedule tasks & follow-ups in Outlook directly from a ticket — no context switching.
